

Carpo Diem

VITAMIN SEA

Carpo Diem promotes flowering & fruit - setting

Fertilizer Group (f) Min. Dec. 257921/2004
Marketing Authorization No. 224

What is Carpo Diem?

Carpo Diem is an organic biostimulator for fruit setting derived from the gentle and natural processing of fresh marine raw materials (fish), fruit and herbal extracts. Contains organic matter, amino acids, B vitamins, growth regulators, humic-fulvic acids, macronutrients and trace elements (Calcium, Magnesium, Iron).

Essential Element for fruit- setting, plants' increase and growth

Boron

Promotes flowering and fruit- setting as it favors flowers' formation and fertilization. In addition, it ensures the smooth growth of meristematic tissues and the differentiation of cells, favoring the synthesis of nucleic acids, proteins and auxin.

Boron participates in the specialized composition of Carpo Diem that aims to meet the nutritional needs of plants in the most critical and stress-sensitive stage of flowering and fruit formation and therefore increase yield with quality characteristics.

Why we choose Carpo Diem?

Method of Application & Dosages

Carpo Diem is suitable for foliar sprays and for applications via fertigation. Generally to be applied to the following dosages:

Foliar application: 200-500 ml per 100 liters of water
Fertigation: 10-25 lt/Ha

Composition

Carpo Diem is applied at the beginning of flowering and in the early stages of fruit formation.

Composition	%w/w
Total Nitrogen (N)	4,3%
Phosphorus (P_2O_5) Soluble inorganic acids	2,7%
Potassium (K_2O)	2,7%
Organic Carbon (C)	3,5%
Organic matter	29,5%
Total Amino Acids	2779 mg/100g
Calcium Total Ca-EDTA	1,7%
Total Iron (Fe)	0,009%
Total Magnesium (MgO)	0,4%
Boron (B)	1,3%

pH: 7

The product also contains Vitamins B3, B6, B2, B1 and Humic and Fulvic Acids
